**20. Patina from Patcraft**

Part of Patcraft's newest tile collection, Artefact, Patina features subtle patterns alluding to primitive surfaces marked by water and time and celebrates the natural course of age and weathering. The versatile collection, featuring four distinct products, was inspired by an oxidation experiment exposing fabrics to metal, rust and water. [patcraft.com](http://patcraft.com)

**21. Queue from Bernhardt**

Bernhardt Design is pleased to present the American debut of Danish designer Claus Breholt with the launch of Queue, a modern take on the classic café chair, merging craftsmanship with the capabilities of technology. Queue is fabricated in polypropylene and is available in Slate Blue, Blush, Sienna, Tobacco, Anthracite and White. The molded foam seat may be upholstered in any Bernhardt textiles, fabric, leather and the customer's own material. [bernhardt.com](http://bernhardt.com)

**22. Reversible Flatweaves from Scott Group Studio**

Flatweave from Scott Group is a seven-piece rug collection that uses traditional handwoven techniques with graphic interpretations of organic forms. These cotton and wool blended rugs come in over a dozen standard colorways/patterns. [scottgroup-studio.com](http://scottgroup-studio.com)

**23. Sunweave from Mohawk Group**

Sunweave is a Living Product Challenge Petal certified woven broadloom carpet collection that merges the time-honored craft of woven construction with today's desire for artisanal materials, authenticity and warmth in contract spaces. Inspired by women weavers of indigenous cultures around the world, Sunweave evokes the natural patterns found in baskets, blankets and textiles realized in its biophilic design. **24. Sakonnet Chair from O&G Studio**

In collaboration with Lothar Windels, O&G Studio releases the Sakonnet Chair, which offers a scaled-down interpretation of the American Windsor. It borrows language from the historic Brace Back Windsor, where diagonal back spindles provide strength and elegance, and utilizes one center back spindle to create visual and structural integrity. Constructed from solid hardwood, the linear form sits gracefully without extraneous material or ornamentation. [oandgstudio.com](http://oandgstudio.com)
