Reporting to the second shift supervisor, the Production Design and Quality Inspector requires an energetic, service oriented individual to lead, manage and provide accountability to our second shift production employees. You will work to support production through all phases and complete inspections / suggest improvements in the manufacturing process.

This role requires leadership, creativity, critical thinking, business understanding, communication, and organizational skills

**Duties**

- Perform inspections during the manufacturing process and bring in the designer or management if necessary to address issues. Monitor and ensure completion of any repairs required during inspection
- Work with project designer and production to successfully handle product specifications
- Pre-shear sign off on shearing tables for correct pile height and appearance on all jobs
- Monitor specific concerns that the project designer may have on a project
- Suggest and initiate improvements in production and quality processes
- Provide input to peers on projects and assist where needed
- Ensure product specifications are met

**Abilities**

- Meet project deadlines
- Understand design principles and aesthetics, as well as specifications and dimensions
- Use custom operating software effectively to complete assigned tasks
- Handle quality control checks
- Work independently, prioritize projects, and work well with others in a team environment
- Strong multi-tasking and organizational skills
- Cannot have wool allergies

**Requirements**

- Associate's Degree or three plus years related experience
- Design or Quality Control training/experience a plus
- Strong computer skills with knowledge of CAD software a plus.

We are an equal opportunity employer and value diversity at our company. We do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.
