

Padding

Wall-to-Wall or Inset

- TreadMor ¼" 68 oz Pad or similar (standard recommendation)
 - o Good for commercial and hospitality installations with heavy foot or rolling traffic
 - o Double stick installation for superb carpet support and feel underfoot
 - o High density and ounce weight for superior resiliency – increases appearance and life span of carpet
 - o Anti-fatigue - superior comfort and support for legs and back
 - o Superior noise suppression - better IIC & STC ratings than other surfaces
 - o Made with 100% synthetic rubber - will not crumble or bottom out
 - o Moisture resistant - blocks out dirt and liquid
 - o Anti-microbial/non-allergenic - will not support the growth of odor causing microbes, mold, or mildew
 - o VOC friendly – CRI Green Label Plus certified
 - o Contains no less than 20% pre-consumer recycled material
 - o At the end of the cushion's useful life, it can be 100% recycled - manufacturing trim material is recycled into Rebond cushion
 - o Contributes toward LEED building credits
 - o Meets US cities toughest fire codes

Area Rug

- No-Muv Non-Skid (standard recommendation)
 - o Natural rubber; no harmful PVC's.
 - o Washable
 - o Mothproof
 - o Hypoallergenic
 - o Ribbed for ventilation
 - o Affordable

- No-Muv DuraHold (if more cushion is desired)

- o Needle-punched, solution-dyed construction that will not shred
- o Hypoallergenic
- o Ridges on the surface hold the rug tight and tread on the bottom grips even the slipperiest floors
- o Thicker pad provides greater cushion, but may create a more noticeable drop-off at the edge of the rug
- o Higher cost than standard non-skid pad

Stairs

- No-Muv DuraHold strips (standard recommendation)

- o Needle-punched, solution-dyed construction that will not shred
- o Hypoallergenic
- o Ridges on the surface hold the carpet tight and tread on the bottom grips the stair surface
- o Provides cushion
